PROFESSIONAL SUMMARY

Detail-oriented Software Engineer with extensive experience in developing intelligent features for Google Workspace applications. Proficient in modern web technologies and frameworks, with a strong focus on enhancing user experience and software reliability. Proven ability to lead projects and mentor junior engineers, driving cross-team collaboration to deliver high-quality software solutions.

CORE SKILLS

JavaScript, TypeScript, React, Node.js, REST API, SQL, MongoDB, PostgreSQL, Docker, Testing, Agile, Problem Solving, Cloud, Microservices, CI/CD, Debugging, Cross-team Collaboration, Technical Design, Mentoring, Software Reliability, Git, Android Studio, Emscripten, Blaze, j2CL, Web Assembly

PROFESSIONAL EXPERIENCE

Software Engineer, Level IV | Google LLC | New York | Dec 2022 - Present

- Developing and enhancing features for Google Keep, improving user engagement and satisfaction.
- Collaborating with cross-functional teams to ensure software reliability and performance.

Software Engineer, Level IV | Google India Pvt Ltd | Bangalore | Aug 2020 - Nov 2022

- Engineered intelligent features for Google Workspace Editors, utilizing advanced client-side technologies.
- Implemented spellcheck and writing style suggestions for five languages, enhancing user experience.
- Led technical design and documentation efforts, driving cross-team collaboration and technical debt resolution.
- Mentored junior engineers, facilitating skill development and timely product delivery.

Software Engineering Intern | Google India Pvt Ltd | Bangalore | May 2019 - July 2019

- Contributed to the development of the Google Docs text auto-correction feature, enhancing user interface and functionality.

Research Intern | Big Data Experience Labs, Adobe Research | Bangalore | May 2018 - July 2018

- Developed a mobile application for Text to Scene Conversion in Augmented Reality, applying novel research techniques.

PROJECTS

Graph Neural Networks for Extreme Summarization

Formulated graph-based deep neural models for the Extreme Summarization task.

- Achieved superior performance compared to traditional models.

Risk-Sensitivity in Multi-Armed Bandits

Surveyed and implemented risk-sensitivity methods for stochastic bandit problems.

- Enhanced the Explore-Then-Commit algorithm for better performance.

EDUCATION

Dual Degree (B.Tech + M.Tech) in Computer Science and Engineering | Indian Institute of Technology Madras | Chennai, India | 2015-2020

XII - Karnataka Board | KLE Society's Independent PU College | Bangalore | 2015

X - ICSE | B P Indian Public School | Bangalore | 2013
